VOLUME 21; NUMBER 19

LOCAL MEN INJURED WHEN TRAIN HITS CAR

A Southern Pacific passenger train crashed broadside into a Market Street Railway interurban car Tuesday at the Leipsic crossing near Holy Cross cemetery, seriously injuring three men and causing minor injuries to five others.

The train struck the street car squarely in the middle, carried it for 50 feet, and then hurled it, demolished, to the further side of a fifteen-foot gulley.

Those most seriously injured were:

Edward Inker, 3224 Mission street, San Francisco, internal injuries and broken arm and leg.

James Butts, 123 Los Banos avenue, Daly City, possible fracture of the skull, broken arm and hip.

Charles Burrick, 27 Hillcrest Drive, Daly City, cuts and bruises, and possible spinal injuries.

The three men are workers in a South San Francisco factory, and were on their way to work when the accident occurred. They were the only passengers on the car so seriously hurt that hospital attention was necessary, and were taken to the South San Francisco hospital.

By a queer twist of fate, the crash took place at an intersection where trains pass only twice daily. The railroad line is the old Valencia street track of the Southern Pacific, and two trains a day are despatched in order to retain the franchise.

Fred S. Williams, motorman of the street car, declared after the accident that it was his first trip on the South San Francisco run in two years, and that he was unaware that the old Southern Pacific track was ever used. The conductor of the car and the other passengers, seeing the approaching collision, jumped to the rear of the car and saved themselves. No one on the train was injured.

NATIVE DAUGHTERS ATTEND LUNCHEON IN SAN FRANCISCO

Many members of the California History Club of El Carmelo Parlor No. 181, Native Daughters of the Golden West, attended the luncheon given by the California Historical Society at the Clift Hotel, San Francisco, on Tuesday, June 29. The speaker was Reverend Father Augustine, O. F. M., Superior Santa Barbara Mission, and his subject, "The Architecture of Santa Barbara Mission, the Original Buildings and the Restoration."

The regular meetings of our Native Daughter California History Club will resume immediately after the vacation months, when the members will begin their year's work with the study of the early history of San Mateo county, particularly that of Daly City and Colma. Stories of early days in San Mateo county from the lips of "old timers" who are living in our midst will be welcome to the club.

The work of restoring California's "Queen Mission" at Santa Barbara, the heritage of all who are privileged children of California, will be discussed and plans made to raise a fund to help in the restoration of this landmark.

A PRETTY CHURCH WEDDING

Miss Eleanor Brown and Mr. G. W. Carle were married Saturday, June 26, at the Grace Presbyterian church, Hanover and Templeton.

The bride's gown was of whiteorgette. Her long veil was held by a wreath of orange blossoms. The bridesmaids, Miss Carle, the groom's sister, and Miss Brown, the bride's sister, were dressed in orchidorgette.

The church was beautifully decorated and the service was very impressive. The bridal couple received many beautiful and useful presents and were congratulated by everyone present.

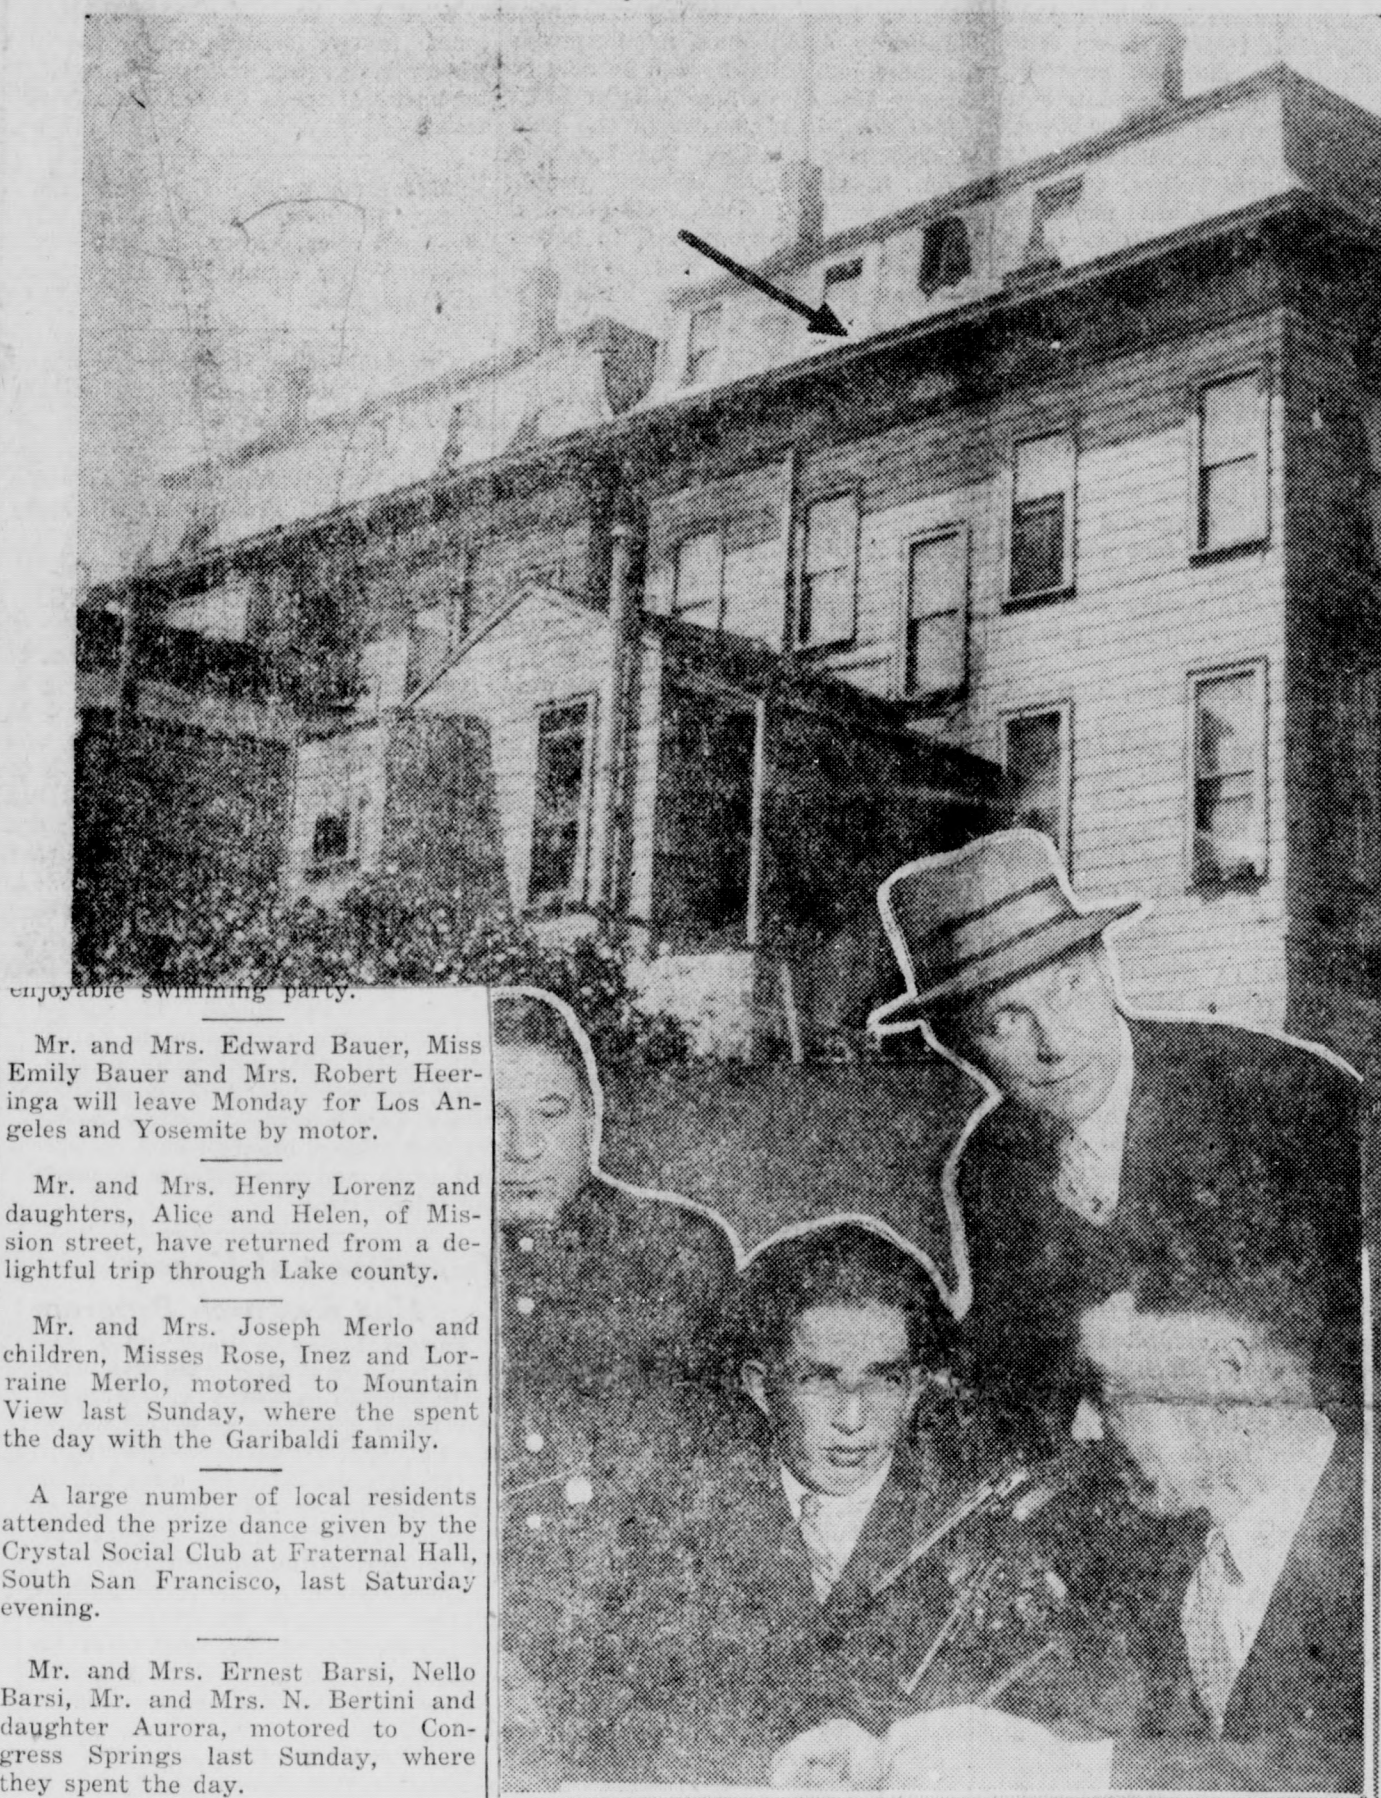

EVENING CLASS FOR ALIENS

The citizenship evening class at the Jefferson Union high school is being kept open during the month of July. All aliens who are contemplating taking out their second papers in the near future are invited to enroll in an intensive course of training in the requirements of the Constitution, and for new citizens is being given. The class is under the direction of Mrs. Josie Frary, director of the Americanization department.

Church Social Well Attended

Mrs. M. Collopy, chairlady of the committee in charge of the combined Irish and modern dance festival held Saturday in the Daly City Auditorium, reports the affair a wonderful success. The dance was given as a benefit for the St. Maximus church. The dance was well attended, and all present seemed to have a most enjoyable time.

Bandit Gang Run Down by San Mateo County Officers

Mr. and Mrs. Edward Bauer, Miss Emily Bauer and Mrs. Robert Heeringa will leave Monday for Los Angeles and Yosemite by motor.

Mr. and Mrs. Henry Lorenz and daughters, Alice and Helen, of Mission street, have returned from a delightful trip through Lake county.

Mr. and Mrs. Joseph Merlo and children, Misses Rose, Inez and Lorraine Merlo, motored to Mountain View last Sunday, where they spent the day with the Garibaldi family.

A large number of local residents attended the prize dance given by the Crystal Social Club at Fraternal Hall, South San Francisco, last Saturday evening.

Mr. and Mrs. Ernest Barsi, Nello Barsi, Mr. and Mrs. N. Bertini and daughter Aurora, motored to Congress Springs last Sunday, where they spent the day.

Misses Florence McKendrick and Louise Segale will entertain the members of La Fiesta Social Club at the home of Miss McKendrick in Daly City on this Friday evening.

The drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, is now drilling every Friday evening in the Daly City Auditorium under the direction of Mr. Fred Collins.

an international man who shot Joseph Martini, Colma cafe proprietor, was captured in San Francisco last Wednesday night.

The capture was accomplished by a posse led by Constable S. A. Landini of Colma. Constable Landini had been on the trail of the bandit gang unceasingly since the shooting of Martini. Working in co-operation with Sheriff T. C. McGovern, the Colma officer executed a raid on a house at 1854 Gough street early Saturday morning and arrested four men declared to be members of Raffalli's gang.

Raffalli was arrested Wednesday night by Constable Landini as he attempted to slip from a lower Broadway restaurant into a rooming house nearby. He was recognized by Landini as he came up the street. He was taken completely by surprise. He attempted to resist, but gave up when he realized that escape was impossible.

Raffalli was immediately taken to St. Luke's hospital, where Martini hovers between life and death with a bullet shattered left leg and a bullet hole through his abdomen.

Martini positively identified Raffalli as the gunman who shot him on Thursday of last week, it is said.

Martini was assailed from the back by three men as he drove up to his home in Colma from his cafe, which is situated a mile south of town. The first bullet shattered his left leg. The cafe man lifted himself to the knee of his injured leg and returned the fire. He fell and his assailants fled when a bullet ripped through his abdomen. The battle was witnessed by Martini's wife and son, who were in an upper window of their home.

Raffalli, known in the underworld as "The Argentine," because of his nativity, is regarded by police as one

of the most desperate characters in California criminal society.

Constable S. A. Landini, of Colma, Sheriff T. C. McGovern and a posse of San Francisco police detectives last Saturday raided a house in San Francisco, and after a hand to hand encounter, arrested four members of a bandit gang. Raffalli was thought to have escaped capture in this raid by a hair's breadth.

The men were found in a house at 1854 Gough street, San Francisco. The raid was led by Sheriff McGovern and Constable Landini, and culminated after a chase by the San Mateo county officers through three counties in pursuit of the gang charged with the attack upon Martini.

The gang captured includes Willie Avelino, ex-convict, alleged to have told officers of a series of robberies; Joseph LaFrance, known as "Little Frenchie"; Frank Costello, also an ex-convict, and William Raleigh. A fifth man was released after questioning by the officers.

The capture came in a dramatic manner, with officers rushing up a stairway in the three-story house at 1854 Gough street and engaging the bandits in a hand to hand encounter. Statements made by the men, according to Sheriff McGovern, indicated that they had robbed Raymond Smith, 528 San Jose avenue, of \$207 on June 18; robbed Gee Yu Long, 9 Langdon street, of \$432 several weeks ago; had held up five Chinese at Mountain View last month, and held up several concessionaries at the beach. They also admitted robbing Oakland and Emeryville gambling houses, addresses of which have not been determined, and holding up a laundry between Hyde and Larkin street on Washington several weeks ago.

Smith identified Raleigh and Costello as the men who robbed him. Gee Long identified all as having held him up.

Avelino declared he had been employed as a chauffeur by Rinaldo "Doc" Pnciellini, of San Francisco, once a candidate for the state assembly.

Clothing valued at several hundred dollars, believed to have been stolen, was found in the Gough street house by the officers.

According to an announcement of Constable Landini, the men captured are responsible for from thirty to forty robberies in five counties in the past three months.

FIVE HELD AS VIOLATORS OF THE VOLSTEAD LAW

Prohibition agents made five simultaneous raids in Colma, Lawndale and Daly City, Tuesday night, and as a result three men and two women were arrested as dry law violators.

Tom Catlis was taken in his Lawndale home, and Ben Dandrea in his hotel in the same place.

Thomas Spesine was arrested at his soft drink parlor in Colma, and Mrs. Ald Sereni at her home there.

Mrs. A. Angelo was taken at her home in Daly City.

Evidence was said to have been found in each place. All except Catlis were freed on \$500 cash bail.

COMPANY NO. 4 MEMBERS PLAN VACATION JOURNEY

Friday, June 26, Company No. 4, Daly City Volunteer Fire Department, held a meeting at their fire house. Fire Marshal Phillip Ross and Andrew Chesney were appointed as delegates to the 1927 Fourth of July committee to represent Company No. 4.

MEETS FATAL INJURY IN FIVE STORY FALL

Charles Dhuyvetter, 19 years old, a plumber, residing at 1162 Brunswick street, Daly City, was fatally injured last Monday when he fell five stories down the light well of a building at Gough and Fell streets, San Francisco, where he was working.

Fellow workmen went to his assistance, and he was immediately taken to the Central Emergency hospital, where it was found that his neck had been broken and his skull fractured. He died a few hours after the accident.

According to reports of the accident, the young man slipped and fell, his body hurtling five stories to the ground.

Charles Dhuyvetter was the son of Raymond and Irma Dhuyvetter, and brother of Maurice, Jerome, Albert and Mary Dhuyvetter. He was a native of Belgium, aged 19 years and 6 months. He was well known in Daly City, and leaves besides his immediate family many friends who will sincerely mourn his passing.

The funeral was held Thursday at 9:15 a. m. from the new mortuary chapel of W. C. Lasswell & Co, 6154 Mission street, thence to St. Maximus church, where a requiem high mass was celebrated for the repose of his soul, commencing at 9:30 a. m. Interment was in Holy Cross cemetery.

EL CARMELO PARLOR GIVEN PRAISE BY GRAND PRESIDENT

This clipping was taken from a copy of the "Advance Reports" presented by Grand President Sue J. Irwin to the annual state convention of the Native Daughters of the Golden West, in Sacramento, June 20 to 25.

El Carmelo Parlor, No. 181, Daly City. Every phase of work sponsored by the order is heartily supported by the enthusiastic members of El Carmelo Parlor. Consequently this Parlor is a valuable addition to the fraternal life of Daly City. The publicity program of this Parlor under the supervision of Josephine T. Johnson, the efficient recording secretary, has been so extensive and far reaching in its influence upon the public of California as to deserve presentation that other Parlors might receive ideas adaptable to their own communities. Fourteen pages of mounted clippings as evidence of the Parlor's activities. Each year publicity is preserved in a separate volume. A second volume containing a valuable collection of pictures pertaining to the history and development of California is assembled as these pictures come into possession of the members.

Because of the large variety of interests supplied by the Parlor's program of activities, El Carmelo is gaining in membership rapidly, and the personnel is most desirable.

HOW TO GET THE MOST OUT OF YOUR VACATION

The topic for next Sabbath evening at Grace Presbyterian church will be: "How Shall I Get the Most Out of My Vacation?" This will be of vital interest to all Daly City people and should be attended by a good crowd.

The Daly Vacation Bible school closed Friday with a picnic, and all feel that the two weeks of Bible training has been a very good thing for all.

Some one has said recently when speaking of child labor, "We are not so much in danger of child labor in this country as we are from child idleness, and with 25,000 children in this city, where can the mother feel safe in having her children play." Daly City has no playground; and then we need some one to supervise the children's play to make it really free from danger.

Many are leaving now for their annual outing, and this brings more and more the responsibility on those of us who remain, that we may keep the house of God well filled on each Sabbath, and so we ask that you help.

Not many people of this age are making a great success financially or achieving greatness, but after all life is not counted from the big things done, but the one thing required is, Have you been faithful.

You will meet with a welcome at this church. Charles H. Gatchell, Minister. Phone Delaware 1544.

Mrs. Catherine Rawlins, of 10 Santa Barbara avenue, was married to Mr. Joseph Poitz, of San Francisco, at Redwood City, last Saturday morning, June 26. Mr. Ellton Poitz acted as best man, while Miss Catherine McKendrick was bridesmaid. Mr. and Mrs. Poitz entertained fifty guests at a delicious midnight supper that was held Saturday night. Many Daly City people were present. Mr. and Mrs. Poitz intend to make their home here.

PLANS PROGRESS TO IMPROVE CITY PARK

At the meeting of the Daly City board of trustees last Monday night, Mayor H. H. Smith presided for the first time in nearly a month, he having been absent from the city on his vacation. City Clerk B. C. Ross was also present after his two weeks' vacation.

Chairman O'Rourke of the street committee stated that he has instructed the city engineer to prepare maps and cost of the unfinished Knowles avenue and the adjoining cross streets. These will then be submitted to the people of that section. When this section is paved, it will make the district 100 per cent paved.

Trustee Sundermann reported fine co-operation with our local police and county officials in stopping the sale of fireworks.

A fine report was made by Trustee Moran on the destruction of unsanitary shacks. He stated that the board of health and the fire chief, along with the police, are working together for a better and cleaner city.

A contract was let for a concrete wall to protect the side of Fire House No. 5. This went to Mr. Stura, the lowest bidder.

Trustee Bodien, of the city planning committee, reported that Daly City has made its first move to have a city park. Graders and plows are now at work leveling the two top floors of the park. When finished, a better idea of the next move will be had.

The publicity committee, through Chairman Bodien, reported that many organizations have appointed their two members to represent them on the 1924 Fourth of July committee. This committee will meet in the City Council chambers on July 21, next, to arrange for next year's celebration. The committee is using the Daly City Record as a means to notify all organizations of this meeting. It is impossible to send individual notices at this time, so the committee advises all organizations to please take notice.

The committee on weed cleaning reported that the sections cleaned improve the appearance of the town, and it will not be long before the entire district has been cleared of weeds.

EARNINGS OF STATE FUNDS ESTABLISH NEW HIGH PEAK

Interest earnings of state funds for the 1925-1926 fiscal year, which ended June 30, established a new high peak, reaching a total of \$1,378,983.64, according to announcement by State Treasurer Charles G. Johnson.

The treasurer's report indicated that the interest moneys earned during the twelve month period increased \$336,507.69 over collections for the preceding year.

"For the past two years," said Treasurer Johnson, "the total collected on state funds deposited with California banks aggregated nearly \$2,500,000.

"The collections for the biennial period are the highest in the history of the state government and are \$921,369.59 in excess of the estimated earnings for the two years fixed by the state budget board. The budget board estimated the earnings of the office at \$1,500,000 and the actual amount collected was \$2,421,369.59.

"It has been my policy to keep all state funds not required for daily counter claims at work for the taxpayers. The phenomenal increase achieved under this method testifies as to its efficiency. 'Call money' formerly retained in the treasury vaults without interest has been placed on deposit with state banks during my administration and has been kept there until the time it was required for expenditure."

The treasurer's report carried the following comparative statement on interest earnings for the two fiscal years:

Inactive deposits, 1924-25, \$922,463.88; 1925-26, \$1,230,598.94.
Active or checking deposits, 1924-25, \$116,622.99; 1925-26, \$143,614.59.
Fiscal Agency N. Y., 1924-25, \$3,644.08; 1925-26, \$4,725.11.

BOY DROWNS WHEN CANOE UPSETS ON SEARSVILLE LAKE

James O'Brien, aged 19, of 249 Chenery street, San Francisco, was drowned last Sunday in Searsville Lake, west of Palo Alto, when a canoe in which he was riding overturned. Young O'Brien was unable to swim and sank in about 20 feet of water. The body was recovered in about half an hour, but all attempts at resuscitation were futile. Fred Pierce, of San Francisco, a companion of O'Brien, was able to reach the shore, otherwise it would have been a double tragedy.

Child's Health Maintained By Wholesome Diet

Modern educators are leaning more each year to the old Greek idea of rearing the citizens of the future. They are working on the principle of "a sound mind in a sound body."

Good health is built primarily on the foundation of right food. The sort of food the child has determines to a large extent the fitness of the man or woman.

Children have to be taught to like the foods that are good for them much in the same way that they have to be taught arithmetic and history. Boys and girls are not born with any particular desire for cereals or for bread. It's up to their parents to see that they learn the rudiments of a balanced diet and the reason for such a diet. Firmness and patience are often necessary in the teaching, but the job must be done.

Many mothers unconsciously put their children under health handicaps by allowing them to use their own discretion in the matter of eating candy, fruit, nuts and cookies. By so

doing they set a precedent in the matter of other foods and make the teaching of good nutrition harder.

One or two articles are not enough to supply a child's needs for a meal. In order that there be normal development, there must be variety.

Fresh eggs, whole cereals, fruits in season and leafy vegetables should occupy an important part in the growing child's dietary. Then, too, a certain amount of concentrated food is necessary for children, because rapid growth whets their appetites to a razor edge, so that they crave more food than their systems can well dispose of. Evaporated milk, diluted with orange juice as a drink, or in custards or other baked foods, is especially beneficial for the growing child for the reason that it is concentrated to double the richness of ordinary cow's milk and is entirely sterile as well. The can of evaporated milk solves the problem of obtaining perfectly pure milk, as well as the problem of lack of refrigeration facilities, since this type of milk will keep indefinitely in the can.

Foreign Dishes Bring Added Zest to Dinner

By MRS. WM. C. POST

Height of my culinary ambition always has been to make dinner each day a gastronomic poem, rounded and perfect like a stately rhyme. A meal that pleases eyes, nose and palate alike!

Mrs. Wm. Post.

A well-turned dinner is like a pretty woman in that it unlocks men's hearts with a magical key. Exotic dishes give a tang of other lands to the dinner table. Things foreign awaken the romantic sense. Taste of codfish a la Benedictine transports one for the minute to the Montmartre in gay Paris. A dash of Piroshki and we are supping in a quaint cafe on the Nevsky Prospekt in Leningrad, while the crunch of English tea cakes may bring visions of the rolling moors of Sussex.

As an aid to the housewife in carrying out this new and fascinating idea in cooking, the following of my recipes may prove of particular interest:

Italian Polenta.

8 cups hot-cooked 1 1/2 tsp. butter
rice or mush or olive oil
Beat the butter into the mush while hot. Turn onto a hot serving plate and pour over the following cheese sauce:

Cheese Sauce.

2 tbsp. fat 1/4 cup evaporated
2 tbsp. flour milk diluted
1/4 tsp. salt with
Dash pepper 1/4 cup meat stock
1/4 cup grated cheese

Melt the fat, add the flour, salt and pepper, and stir until the mass is smooth. Add the diluted milk and cook in a double boiler. Stir occasionally to keep smooth. Add grated cheese to the hot sauce and stir until melted or about three minutes.

Buttlen Kuchen.

1 1/4 cups sugar 2 1/4 cups flour
1/4 cup butter 4 tsp. baking
2 eggs, separated powder
1-3 cup evaporated Grated rind of 1
milk diluted lemon
with Chopped or sliced
2-3 cup water almonds

Cream butter and sugar, add yolks of eggs and the lemon rind, stirring constantly. Mix flour and baking powder, add to the butter mixture, alternately with the milk and lastly stir in the stiffly beaten whites of eggs. Place in well-greased shallow coffee cake tins, sprinkle with granulated sugar, cinnamon and a few almonds, sliced fine or chopped. Bake in a moderate oven.

ODDS AND ENDS

Henry Bramley, of St. Louis, swore at his wife because he didn't like her pancakes; then his son shot him in the shoulder.

Herman Glicker, of Evanston, Ill., had a leg torn off when an automobile struck him, but it happened to be his wooden leg.

A divorce on the grounds of cruelty was granted in London to Mrs. Acie Bethel Kitzinger Firth Ishti Hielena Gioga Pictoria Denver Hill.

When sued for \$14.01, Mrs. Clara McKay, of St. Paul, admitted that she owed \$14, but hired a lawyer to fight the claim for the extra cent.

Bobbed hair has caused a slump in the sale of bathing caps along the Atlantic bathing beaches.

Gretchen Zerlin, of Berlin, jilted Karl Roeser and he has sued her for \$5,000 damages.

A doctor, an ambulance and the fire department appeared simultaneously at the home of J. C. Rustin, in Chicago, in response to calls sent by a practical joker.

Paul, Lesieur, crippled porter, gave an alarm and saved the lives of thirty guests in a hotel at Nancy, France.

When Mlle. Helene Zalliere, of Paris, was taken to a police station, a ring she was accused of stealing was found in her mouth.

Because James Dibben, of Chicago, stole a kiss from Thomas Grant's sweetheart, Grant gave him a beating and was fined.

Henry E. Dean, of Worcester, England, left \$70,000 as a trust fund for the care of his dog.

Mrs. Edith R. Pearce, of Chicago, was dealt thirteen hearts in a bridge game at a charity party.

Henry Morrison, of Derby, England, stole a bunch of golf clubs and was arrested while trying them out on the course.

H. W. Powell, of Uffington, England, whipped Rev. E. M. Hadow for going shopping with Mrs. Powell, but later admitted his error and paid the minister \$100 damages.

George and Leo Murray, 14-year-old London twins, were both operated on for double cross-eyes the same day.

Osmaston Jenny, a cow owned by J. P. Fletcher, of London, has exceeded 2,000 gallons of milk a year for five consecutive years.

John Deveney, of Dublin, won a foot-race for men over 70 by dropping dead as he crossed the finish line.

Stephen Flood, of Belfast, was sent to prison for beating his mother-in-law with his wooden leg.

Miss Marion Ketchell, of Chicago, caused the arrest of Frank Flynn, her fiancée, for stealing jewelry from her home.

George Daley, of Glencoe, Ill., aged 85, escaped death in a fire by sliding down an iron pipe from the third floor of the burning building.

George Flustrin, a bald-headed burglar of Vienna, was found to have sixty-eight different wigs of various colors in his home when arrested.

Mrs. Sarah Vernon, of Edinburgh, danced the Highland fling in celebration of her 102nd birthday.

Ada Theal, aged 18, of Nottingham, England, stole money to buy a dance dress and was sentenced to go to bed at 10 o'clock every night for three years.

A dozen live snakes were found in a parcel left on a passenger train in Chicago.

Miss Margaret Dawson, of Cardiff, after working as a scrub-woman for forty years, left an estate of \$80,000.

Johann Zorlem, 72, married Margaretta Rohrer, 22, and was arrested for bigamy while on his honeymoon in Berlin.

R. A. Sheldon, of Duluth, smelled a strange cigarette odor in his home, which led him to discover a burglar under a bed, waiting to rob the house.

Morris Keller, of Chicago, was sent to jail for two weeks on a charge of binding and gagging his wife when she reproached him for being drunk.

Captain Richard Peterson, of Dublin, left \$60,000 to a nurse who attended him during the war.

Mrs. Mary Kane, of Glasgow, was arrested on the charge of selling her baby to her sister for \$25.

Samuel Blair, of Belfast, recently received his twenty-sixth prison sentence the last one being for three years.

The American Sunday is becoming well established as a day of arrest.

TOY TELLS OF WORK OF HIGHWAY COMMISSION

The accomplishments of the California Highway Commission during the last three and a half years, including a detailed statement of \$1,620,300 expended on the San Francisco peninsula, were presented last Friday night by Harvey M. Toy, chairman of the commission, in an address before the Peninsula Chambers of Commerce, Federated, at a meeting in the San Mateo city hall.

During the course of his address, Chairman Toy said that one of the first contracts ever awarded by the present commission was for widening and thickening of a section of the peninsula highway in San Mateo county. "To date," he said, "we have expended \$651,300 for widening work on the peninsula and have pledged \$200,000 additional as the state's share of the project at Cypress Lawn cemetery. Estimates indicate, however, that the state will have to contribute considerably in excess of \$300,000 to complete this job. It will be ready for bids in the near future.

Work completed on the peninsula under the present commission is as follows:

"Through Daly City—Concrete pavement, widening; 1.1 miles; cost, \$6,300.

"San Bruno to Beresford—Asphalt concrete surfacing and cement concrete shoulders (40 feet wide), 5.2 miles; cost, \$307,000.

"Cypress Lawn to San Bruno—Asphalt concrete surfacing and cement concrete shoulders (40 feet wide), 4.4 miles; cost, \$214,000.

"Redwood City to county boundary—Asphalt concrete widening (30 feet), 3.5 miles; cost, \$124,000.

"Total length, 14.2 miles; total cost \$651,300.

"We also have carried forward grading of the Skyline boulevard from Half Moon Bay road to La at a cost of \$572,000. Guard rails on Honda road, a distance of 1223 miles, the same route have been erected at a cost of \$10,500."

ANNUAL DAHLIA SHOW TO BE HELD NEXT MONTH

"Novices" will be especially welcomed as exhibitors at the eleventh annual Dahlia show of the Dahlia Society of California, to be held at the Palace Hotel, San Francisco, on August 26, 27 and 28, according to Carl Salbach, president of the society, and H. T. Henning, secretary and editor of the Dahlia Bulletin. Eighty-seven prizes in all are offered for the best dahlias exhibited in all classes at the show, which has become an established annual event in which professional growers and amateur gardeners join hands in presenting the innumerable types and colors of the dahlia.

San Francisco and the bay region are especially well adapted to raising the best blooms of the spectacular flower, according to the Dahlia Society officials, and interest in producing true strains, novel seedlings, and special colors as well as size and sturdiness is increasing by leaps and bounds, as evidenced by the enthusiastic participants in each succeeding show.

Class "A" entries for professionals offers 17 trophies; Class "B" for professionals, 15; the Advanced Amateur class, 12; the Amateur class, 7; the Novice class, 6; and the "Open for All" class, 12.

A special prize for schools will be offered to the San Francisco school making the best display of dahlias. The J. W. Davis cup, highly prized by the young amateurs in the city schools, was won last year by General Pershing school.

NEW TELEPHONE BUILDING GOING UP AT SAN CARLOS

The new \$9,000 building now being erected by the Pacific Telephone and Telegraph Company on the north side of Laurel street, west of Holly street, in San Carlos, is now rapidly approaching completion.

The building will house the new telephone exchange, which will serve San Carlos and Belmont, and preparations are now being made to begin installation of the necessary equipment, which will cost \$66,000.

According to the Telephone Company, the building and exchange were necessitated by the rapid expansion of the two communities, and the building has been so designed that additions can be made in the rear when future expansion makes additional facilities necessary.

The front portion of the building will be devoted to the business office, and the exchange apparatus will be located in the rear.

Four Pinned Beneath Automobile

Walter Noorick, Louis Feldon, Clyde Lortantz and Clayton Johnson, all of San Francisco, were found Sunday night pinned beneath an overturned automobile which had gone over an embankment near Moss Beach. Three were but slightly injured, but Noorick sustained a possible fracture of the skull and other serious injuries.

Ted—"Mary says she intends to keep her youth."

Millicent—"I know. She never introduces him to anyone."—Vancouver (Wash.) Columbian.

The highway to the road-house might also be termed a route of evil.

It's only a flea that can travel fast on an empty stomach.

AN INSPIRATION

In response to many inquiries that have come to this office in regard to the lectures being given by McAlbert, at the Native Sons Building, at 414 Mason street, San Francisco, we wish to state that these interesting and instructive lectures are open to all. Many local people are attending, and are receiving great benefit from these talks on a number of subjects concerning the welfare of the body, mentally, physically and spiritually. Twice daily, at 2:00 p. m. and 8:00 p. m., the public is invited to attend, and questions will be answered after each meeting. Special talks for ladies only are given on Tuesday and Friday at 2:00 p. m. Many who have been attending regularly have remarked on the singing by "Maurine," the Wonder Girl, and are taking their friends with them to these interesting meetings. Those who wish to make appointments for individual analysis will be able to arrange this by calling Douglas 133.

McAlbert is a pioneer in the field of character analysis, and the help given thousands of earnest people who desire to improve their physical and mental conditions, and to better themselves in every way, is a testimony to the thorough knowledge and clear insight into human character that is his.

MODERN SCIENCE

Science has made great advances in the past few years, and many of the old-fashioned ideas have been discarded in the light of new discoveries. Whereas, formerly, the family doctor treated everything from toothache to smallpox, the person of these modern times has available a specialist for the treatment of any ailment he may have. Modern science, and particularly the X-Ray, has done wonders in locating and diagnosing disturbances in the human system. The specialized study of the spine and the nervous system shows the importance of keeping the nerves free from pressure in order to have and maintain a healthy body.

The Chiropractic System of treating disease is long past the experimental stages, and it is now a fully recognized fact that the science of Chiropractic is one of the foremost in the world. A leader in this field in the Bay region is Dr. F. Shay, located at 830 Market street, whose phone number is Douglas 3730, who needs no recommendation to the people of this locality.

X-Ray service is given where necessary.

The practice of this well-known Chiropractor has increased by rapid strides until now he is considered one of the leading professional persons of this section, and is consulted by many who are using the same system of treatment, as he has had many years of experience in this profession. His large clientele is made up of both local and out-of-town people who have found that the expert attention given by this prominent doctor is unequalled.

We are pleased in this review to compliment Dr. F. Shay upon the merited success he is making, and upon his excellent standing in the professional world, and we assure our readers that in his office they will receive the very best spinal adjustments.

Bill Batchelor says that the modern girl doesn't think much of a young fellow who tries to kiss her—and fails.

As transgressors increase we need more paved roads to make their way hard.

FATHER KNICKERBOCKER'S PIONEER TELEPHONE LINE

The honor of having had the first telephone in the area now comprising Greater New York belongs equally to the boroughs of Brooklyn and Manhattan.

It was in 1877 that the first telephone was installed. At that time the Brooklyn Bridge was under construction. The work of producing the steel cables for the new bridge was in the hands of the J. L. Haigh Steel Company, and to facilitate them in their work a single line was strung across the half finished bridge, connecting their factory in South Brooklyn with their offices at 81 John street, New York. This was the first commercial use of the telephone in New York City.

What has become of the old-fashioned farmer whose only expected government relief was the annual assortment of seeds from his congressman?

A contributor to the New York Times discusses "Protecting Wild Beauty." But many of the wild beauties now running at large need no protection.

Our idea of a fine job for a go-getter is that of secretary of the Herrin Chamber of Commerce.

That Pennsylvania primary caused a suspicion that Truman H. Newberry was a piker.

INSTRUCTIONS IN SEWING

For beginners, desiring to learn to make house dresses and remodeling of children's garments. First class, 11 to 15 years of age, Thursday and Fridays, 9 to 11 a. m. Two hour lessons, 50 cents each. Second class, past 15 years of age, Thursday and Friday afternoons. Two hour lessons, 60 cents each. Free instruction in crocheting, tatting and embroidery. Half hour each lesson. Mrs. B. J. Holcomb, 127 Los Banos avenue, Daly City.

COUNTY LINE SE

GEORGE E. ARC

5900-60 Mission Street

Out of 290 enrolled in the Smyrna College for Girls, 270 are Turkish.

FOR SALE—A good practice piano. Will sell cheap. Apply 301 San Mateo avenue. Phone Randolph 4160.

FOR RENT—Furnished rooms, clean and comfortable; gents only; half block from Mission car line. Inquire Thomas Jefferson Cleaning Works, opposite post office. Phone Randolph 6249.

Four-room cottage to let, 953 Hanover street; hardwood floors; garage; fine yard. Key at 961 Hanover street.

FOR SALE—Modern four-room and basement home, good location, 3 years old. Price \$4,200; \$500 down, then \$35 per month, including interest. Community Realty Co., 6298 Mission street.

FOR SALE—Three-piece ivory bedroom set; a garbage burner; and a Wedgewood heater. Telephone Delaware 63.

FOR SALE—1924 Chevrolet touring car in splendid condition.

"The Cattle Grubs or Ox Warbles" is the title of a new pamphlet issued by the Department of Agriculture. We once lived in the country, but we never saw cattle grub nor heard a warbling sound from an ox.

Many who admit that they were foolish once upon a time would resent the suggestion that they are still that way.

A credit man is one who directs that your order shall be shipped C. O. D.

NOTICE TO CREDITORS

No. 3856.
In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of Louis Lagomarsino, Deceased.
Notice is hereby given by the undersigned Alice Lagomarsino, executrix of the last will and testament of Louis Lagomarsino, deceased, to the creditors of and all persons having claims against the said deceased, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit the same, with the necessary vouchers, within four (4) months after the first publication of this notice, to the said executrix at the law offices of J. E. McCurdy, Wisconsin Building, San Mateo, California, the same being the place for the transaction of the business of said estate in the County of San Mateo, State of California.

Dated this 18th day of June, 1926.
ALICE LAGOMARSINO, Executrix of the Estate of Louis Lagomarsino, Deceased.
J. E. McCurdy, Attorney for Said Executrix, San Mateo, California.

Colma News Notes

By SYLVIA HAUBRICH FISCHER

The beautiful home of Mr. and Mrs. Capurro is fast nearing completion.

Mrs. Iva Garcia Solbach has resumed her duties at the Belli Motor Company.

Mrs. Annie B. Bauer is enjoying a two weeks vacation from her duties at Marks Bros.

Miss Thelma Selmi left Monday for Calistoga, where she will spend the week with relatives.

Mrs. Fred Pasero and daughter May, of Vale street, spent one day of this week in San Francisco.

Mr. and Mrs. Henry Lorenz, of Mission street, have purchased a Chevrolet touring car with a California top.

Mrs. Annie Biggio and children, Ruth and Henry, of San Pedro avenue, are enjoying a delightful vacation at Fairfax.

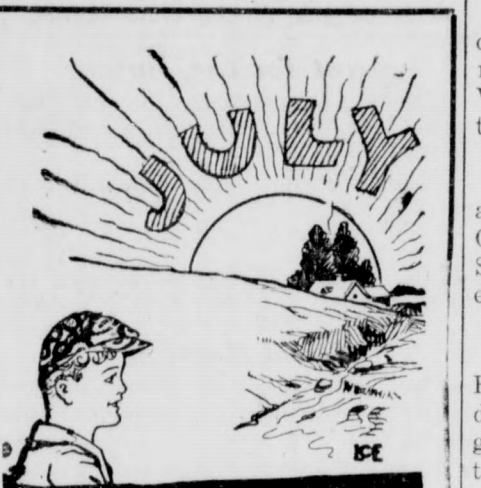

Miss Rosa Bauer is now employed as bookkeeper in the main office of the Thomas Dyeing and Cleaning Works, in San Francisco.

Mr. and Mrs. Al Zanetti, of Vale street, attended a party given in honor of Miss Eleanor Sani in South San Francisco last Tuesday evening.

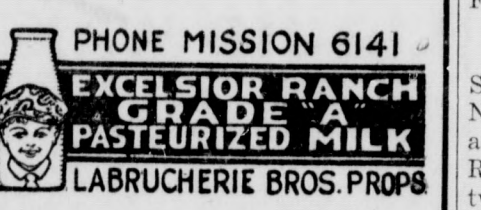

Miss Hilda Bocci recently became the bride of Mr. DeMartini. The ceremony was performed in Holy Angels church by Reverend Father Schenone.

Mrs. Eugene Graziani and children, Leonard, Eugene and Robert Graziani, of First avenue, and Mrs. Conti and children, Gladys and Louis Conti, spent one day of last week at Ingleside Beach.

Grand Trustee Josephine T. Johnson and Delegates Sylvia Fischer, Thelma Selmi and Laura Figone, who represented El Carmelo Parlor No. 81, Native Daughters of the Golden West, at the Grand Parlor convention in Sacramento last week, returned to their homes on Friday evening.

MIDSUMMER SANITY
Reasonable precaution will prevent sunstroke, and a sensible diet will protect you from other hot weather ills. To ensure perfect freshness and purity in your dairy products, order them from The Excelsior Ranch.

BRANCHES AT VISALIA AND FRESNO PHONE RAND. 7686

Mrs. Peter Benassini and children and Mrs. Morgana are spending the summer vacation at Fairfax.

Mr. and Mrs. Demartini (Hilda Bocci) have returned from their honeymoon and are residing in Colma.

Messrs. Louis Nava, Victor Rossi, Attilio Conserva, Leo Nani and Rudolph Milani enjoyed a motor trip to Guerneville on Butchers' day.

Mrs. B. W. Haubrich, Bennie Haubrich and Mr. and Mrs. Stephen Fischer are leaving Saturday for "Sobre Las Olas" at Capitola By The Sea.

Miss Annie Giorin became the bride of Mr. Antone Valegra at St. Peter and Paul's church in San Francisco last Sunday afternoon. The young couple will reside in Colma.

Mr. and Mrs. John Soldavini and a party of relatives motored to Big Trees in the Santa Cruz mountains last Sunday. Mr. Soldavini is the popular Buick salesman for the local agency.

It will soon be too late to register. You have only the month of July in which to register. See Mr. Angelo Stampanoni, San Pedro avenue, at once, and get your name on the registration list.

Voters, Attention! You have just the month of July in which to register, so attend to this important duty at once. Mr. Angelo Stampanoni will register you any day of the week except Sunday at his place of business on San Pedro avenue.

The members of the Colma Volunteer Fire Department enjoyed a delicious Italian dinner in the Belli Hall recently. Many local people donated delicious eats and helped in other ways to make this affair a success. Much fun and merriment was caused by the favors which were found at each place. The party lasted until a late hour. Flashlight pictures were taken and one of these appeared in the San Francisco Call.

Work is progressing on the new E. W. McClelland hothouses, now being erected at Colma at a cost of \$250,000. Two new buildings, 80 by 280 feet, are being constructed. The greenhouses are said to be the second largest in the United States. It is said McClelland is planning on planting 200,000 carnations and many rose bushes among other things. The hothouse specifications call for five carloads of glass, twenty carloads of sand and gravel and five carloads of cement.

The members of El Carmelo Parlor No. 181, Native Daughters of the Golden West, are very proud to announce the re-election of their Recording Secretary, Josephine T. Johnson, as Grand Trustee of the Native Daughters of the Golden West. Mrs. Johnson, accompanied by Delegates Sylvia Fischer, Thelma Selmi and Laura Figone, attended the Grand Parlor session which was held in the beautiful new Elks building in Sacramento last week, as El Carmelo's representatives. Headquarters were at the Hotel Senator. The Native Daughter Parlors of Sacramento county, under the direction of Past Grand President Gett, were hostess to the visiting delegates and grand officers, and they showed that Sacramento knows how to entertain. One of the most enjoyable features of the entertainment was an auto ride down the Sacramento river to Rio Vista, with a picnic lunch and outdoor program at Isleton. One of the new rules made at Grand Parlor is that girls sixteen years of age may become members of the order, but may not hold office until they are eighteen. Much excellent work has been done by the order during the past year, especially in placing homeless children in childless homes. Pearl E. Lamb, of Tracy, was installed as Grand President of the Native Daughters of the Golden West for the ensuing year.

Misses Florence McKendrick and Louise Segale will entertain the members of La Fiesta Social Club at the home of Miss McKendrick in Daly City on this Friday evening.

The drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, is now drilling every Friday evening in the Daly City Auditorium under the direction of Mr. Fred Collins.

Mr. and Mrs. Gene Gray, Mrs. Slaughter and daughters Maxine and Nadine Slaughter, have returned from an enjoyable motor trip to Montana. Rumor has it that Mr. Gray bagged two mountain lions and a wildcat with a sawed-off shotgun.

When Rear Admiral Thomas Washington settled down to his duties a short time ago as commander of the Twelfth Naval district, with headquarters at San Francisco, he was given a "long distance" gun salute by telephone. Admiral Washington relieved Rear Admiral John Dayton, commandant of the Mare Island Navy Yard, who had been filling both posts. When the orders of the two officers were read in the presence of ranking officers of the district a gun salute was sounded over a direct telephone line between San Francisco and the receiving ship at Goat Island.

MORE LIGHT, LESS CRIME
When Chicago householders asked Morgan A. Collins, superintendent of police, what they could do toward checking the crime epidemic now afflicting their city, he replied: "Burglars rarely enter a home where there is a light burning. Leaving your home in total darkness is an invitation to the sneak thief." Such protection, it is estimated, would cost the average home less than \$1 a year. It is becoming harder for girls to get by with stockings that are not silk all the way.

SIDELIGHTS

By Marcy B. Darnall

Danish women want a common title, analogous to that of Mister for men, which shall not disclose whether they are married or unmarried. Recently there was an agitation to compel married women to wear wedding rings. In these days of equal rights there is no telling what may happen.

The warden of a Berlin prison stood near by while Fritz Gilbert, safecracker, kissed his wife good-bye, but didn't notice that Gilbert transferred from his mouth to that of his wife a small roll of paper. On the paper was written directions for his confederates, who thereby aided his escape.

Routine Saturday morning inspection in the army are said to have been originated by Baron Von Steuben, famed general of the Revolutionary war. His innovation has been responsible for much profanity among fighting men during these 150 years.

Former Sultan Mulai-Abd-el-Hafid of Morocco, weary of inspecting hundreds of candidates for his harem, yet faced with the rule that no other man should look upon the sultan's wives, actual or prospective, appointed a blind official to make the preliminary selections. Of course, the sultan reserved the right of final choice.

Popular songs in Europe are appearing with titles and words almost as idiotic as some of our own. The prevailing hit in Spain is entitled, as translated, "Oh, please don't set the piano on fire." It was suggested, it is said, by the act of a dance hall keeper, who poured gasoline over the piano of a rival.

Recently greatness was thrust upon one Ignatz Moscicki, engineer and inventor of a synthetic fertilizer, Polish born but naturalized Swiss, when he was suddenly elected president of the Polish republic. The new president had never been prominent politically, did not possess a dress shirt in which to be inaugurated, though one was obtained in time for the ceremony—but he was a friend of the victorious General Pilsudski, who dictated his election.

C. M. Grace, negro faith healer, evangelist and all-around crook, under bond to appear in Birmingham under various charges, has been telling a Savannah congregation how the Birmingham jail opened through a miracle and let him out. He has been reaping quite a harvest from the sale of "sacred" handkerchiefs and through other swindling schemes, although reputable negro ministers have denounced him in the public press. But a lot of white folks, too, are duped by religious charlatans.

The first snag struck by the preparatory disarmament commission at Geneva was its attempt to define "armaments," each nation represented having its own interpretation of the meaning of the term. Just now it appears that no practical agreement can be reached because of the complex nature of the problem. It looks as though peace in future must be secured as in the past—by being ready to fight for it.

REAL ECONOMY

In these modern times the automobile holds a central place in the business and private life of everyone. From the rancher, living miles from his nearest neighbor, to the business concern using a fleet of cars, everyone knows that the automobile is a necessity. The cost of a new machine is sometimes so much that the person who has the most need of a car can not buy one, and he continues to ride the street cars, day after day and month after month.

Those who have looked into this subject carefully have found that a great saving can be made by buying a car that has had some use but is still in good condition. If a reliable dealer is patronized, a guarantee will be given with each car sold, and it will be exactly as represented in every way.

Just such a dealer is William L. Hughson, located at 1499 Market street, whose phone number is Park 4380. Every car sold by this well-known concern has been carefully reconditioned before it is offered for sale, and all badly worn or broken parts are replaced. Many bargains in reliable makes of cars may be found among their used stock, and they stand behind every deal they make. The William L. Hughson Company will sell you a splendid used car on a cash basis, thus giving you the benefit of the very lowest prices, or, if you prefer it, very liberal terms can be arranged.

If you have no automobile, now is a good time to buy one. The question to be considered is not CAN YOU AFFORD TO BUY A CAR, but CAN YOU AFFORD NOT TO HAVE ONE? If you go to the William L. Hughson Company you will find courteous salesmen, who will be pleased to demonstrate for you any car in which you may be interested.

Don't forget the whist party given in St. Maximus Hall on Wellington avenue next Wednesday afternoon at 2 o'clock. This party will be under the direction of Mrs. Robertson of Crocker Tract, who assures all who attend of having a good time.

THE NEW SCIENCE

Science has made great advances in the last few years, and many of the old-fashioned ideas have been discarded. Modern science, and particularly the X-Ray, has done wonders in locating and diagnosing disturbances in the human system. The specialized study of the spine and the nervous system shows the importance of keeping the nerves free from pressure in order to have and maintain a healthy body.

The Chiropractic System of treating disease is long past the experimental stages, and it is now a fully recognized fact that the science of Chiropractic is one of the foremost in the world. A leader in this field in the Bay region is Dr. Glen J. Sipes, located at 988 Market street, whose phone number is Prospect 757. Dr. Sipes needs no introduction to the people in this locality. He has in his office the most modern and up-to-date equipment made for the electrical treatments given by him.

The practice of this well-known Chiropractor has increased by rapid strides until now he is considered one of the leading professional persons of this section, and is consulted by many who are using the same system of treatment, as he has had many years of experience in this profession. His large clientele is made up of both local and out-of-town people who have found that the expert attention given by this prominent doctor is unexcelled.

A visit to his office is an education to anyone. It is the most scientifically equipped, we believe, of any office in the Pacific Southwest. The most advanced apparatus made for this profession is here, and everything used by Dr. Sipes is the best that money can buy. We are pleased, in this review, to compliment Dr. Sipes upon the merited success he is making.

—Adv.

THAT YEARLY TRIAL

The constant change of the regulations affecting the making of income tax returns for individuals and corporations results in considerable confusion. It seems that just about the time one has become conversant with the system, there arises the making of the return for his private income or for his business, and he finds that the government has deemed it advisable to make some alterations in the form or in the method of making the return.

This constant change in forms and methods by the government makes it necessary for the individual to seek consultation and advice from those who make it their business to keep posted on these changes. Prominent among the expert accountants of the Bay region is Mr. Frank T. Andrews, located in the United Bank and Trust Company building, whose phone number is Sutter 7060. Mr. Andrews is fully competent to advise and assist in the preparation of income tax returns and to defend tax payers against mistakes or the imposition of excessive taxes.

Mr. Andrews handles not only income tax matters for individuals and corporations, but also specializes in the preparation of briefs and opinions upon tax assessments for the use of attorneys. In the departments of auditing and accounting he makes a specialty of opening books and installing accounting systems for corporations and other business concerns. In order that our readers may know the details of this service, we suggest that they call and consult Mr. Andrews about their accounting work, without obligation. We feel certain that our

readers will benefit from this consultation, and any service that may be rendered by Mr. Andrews. —Adv.

DIVERT RIVER TO CLEAR WAY FOR PERMANENT DAM

The temporary diversion dam for Pit 4 power development project of the Pacific Gas and Electric Company has been completed, and all is now in readiness for the construction of the permanent dam two miles below Pit 3 powerhouse. A force of 275 men are at present at work on the project.

Plans for Pit 4 call for a tunnel more than four miles in length. The waters of the Pit will pass through this tunnel to empty into three penstocks stretching 1,100 feet down a steep slope to a generating plant. With the completion of the development, 134,000 horsepower will be added to the capacity of the company's string of power plants.

Four Hurt in Auto Crash
Mr. and Mrs. F. B. Morrison, San Francisco, and S. McNear and H. A. Tallner, of Mayfield, were cut and bruised Sunday afternoon when automobiles driven by Morrison and McNear collided on the Bay Shore road near San Bruno.

Amp's Advice to Autoists

"If you allow dirt to collect on top of your battery, you're courting trouble. Let us tell you why. The 5-Point Service he gives includes keeping the battery top clean and free from electrical leakage. Battery holds charge better—lasts longer."

—Little Ampers

RADIO

Dr. C. B. Jolliffe of the Radio Laboratory of the Bureau of Standards, With a 250-Watt and a Type "N" Electron Tube.

By DR. ALFRED N. GOLDSMITH

The quality of reproduction of music in the home depends on many elements at the transmitting and receiving stations. Acoustic synchronizing, or the accurate re-creation in the home of the sound waves produced in the studio, is the determining factor in the enjoyment of radio programs. Few people realize the very important part played by vacuum tubes in the receiving set.

From the standpoint of securing real musical results in the home tubes must meet a number of difficult specifications. While high-grade tubes do, as a matter of fact, meet such specifications, it is by no means uncommon to see the entire circle of broadcast transmission and reception broken and tone quality ruined by the use of unsuitable or unreliable vacuum tubes.

Considering, first, some of the electrical constants of the tubes and without going into the technical details of the matter, vacuum tubes have a certain characteristic which is known as the amplification factor. If the amplification of the tubes used in the receiver is too small, weak and unnatural sounding signals will result. If, on the other hand, the amplification is too great in its relation to the design of the receiving set, the receiver may "oscillate" or produce squealing or howling notes which cannot be conveniently eliminated or controlled.

Another important constant is what is known as the "internal impedance" of the tube. Roughly speaking, this is a measure of the opposition of the tube to the flow of plate current through it. It is the factor which limits the current drawn from the "B" battery. If the internal impedance is too small there will be an excessive drain on the plate batteries without corresponding advantage and plate battery renewals will be uncomfortably frequent. On the other hand, if the internal impedance is too high, weak signals of unsatisfactory character will be produced and tone quality on the average loud speaker will be distinctly unsatisfactory. Accordingly, internal impedance of vacuum tubes must also be held within carefully considered limits.

The elements inside of modern vacuum tubes are close together, and they, in conjunction with the wires leading from them to the contact pins in the base of the tube, constitute what are known as electrical capacitors. In other words, there are miniature condensers formed by the filament, grid and plate, the capacities of such condensers residing inside of the tube. It is a fact that in many highly efficient circuits these internal tube capacities definitely influence the electrical behavior of the set. Receivers which are "neutralized" or "balanced" against tendency toward oscillation (howling) are necessarily so balanced for a particular tube. If the internal capacity of tubes varies too far receivers which would otherwise properly function will begin to produce uncontrollable noises, generally of a buzzing or whistling nature, whereupon the musical enjoyment of the audience is destroyed.

The Filament.
Inside the vacuum tube is a glowing element called the filament. It is a sort of reservoir from which streams a current of electricity in the form of a myriad of tiny electrical charges called electrons. These pass from the filament to the plate inside of the tube and their flow is definitely controlled by the grid element between the filament and the plate, which acts as a sort of electric valve, turning on and off the flow of current through the tube and presumably in accordance with the shape of the sound originally produced in the broadcast studio. This, in general terms, is the process whereby the original signal is reproduced in the home. It is clear that an essential portion of this process is the emission of a sufficiently copious stream of electrons from the filament. If the stream is reduced to a mere trickle the signals will become weak and distorted. In this case, even for a low volume of sound in the home,

there will be rattles and distortions in tone quality.

Vacuum tubes used as amplifiers require a high vacuum. Unusual and apparently extravagant precautions must be taken to extract gases from the bulb and even from the metallic elements inside the tube and the very glass itself. The presence of gas in the tubes shortens its life and causes it to be "noisy."

The delicate elements inside of a vacuum tube, if jarred, will vibrate. Some makes of tubes are peculiarly sensitive to mechanical disturbance and easily produce a "ringing note" if the receiving set is touched or tapped. Particularly is this the case if the tube sockets are not effectively cushioned and elastically supported. Vacuum tubes which produce a loud and prolonged ringing note when tapped will not give the same satisfaction as "non-microphonic tubes" which are free from this defect. In any case the vacuum tube mounting should be appropriate.

Suitable Batteries.
A brief mention of the importance of suitable batteries in good condition in their relation to tone quality is pertinent. When the "A" or filament batteries of a receiver run too low the tubes will not light up fully and the signals, besides being weak, are frequently distorted or scratchy in quality. A run-down condition of the "B" or plate batteries similarly causes a noisy or weak signal with distorted quality, or may even give rise to disagreeable howling sounds. The "C" or grid battery also plays a great part in the production of high-quality music.

The best rule is to select reliable tubes, each suited for the particular purpose to which it is to be put in the receiver, and then not overwork these tubes nor neglect the upkeep of the batteries feeding the tubes.

RADIO WAVES

Place the heated soldering iron in an asbestos-lined preserving jar to keep it hot when working on your aerial.

To space turns evenly on coil tubes, guide the wires with a comb, being careful not to strip the insulation.

Antenna and ground leads to the set should be as far apart as possible. Keep one at right angles to the other if you can.

When the batteries are fully charged and the volume gives out, have tubes tested. They may need recharging or replacing.

Ammonia or soda water, quickly applied, will prevent damage from acid dropped while taking a hydrometer reading of the "A" battery.

If your two-step amplifier as a whole causes distortion, try a .001 mfd. fixed condenser across the plate and grid of the last transformer or use a power tube in the last stage.

When the sealing wax at one of the binding post's clips on a "B" battery does not afford full coverage, melt a little of a stick of the wax to make the whole "B" battery envelope airtight.

Shielding of sensitive sets increases selectivity. Line the cabinet with copper or brass sheeting to keep unwanted energy from coils, but keep the shield out of the field of the radio-frequency instruments.

When your set won't tune to the short wave-lengths, try disconnecting the aerial at the point where it enters the house and using an antenna the piece remaining. This cuts the fundamental wave-length of the antenna system, which also includes the ground.

Winding of Coils

To space wires on coils the correct distance, start the coil with thread and wire, at the same time applying considerably more tension to the wire than when no thread is used. After the coil is wound and the end of the wire fastened, the thread may be unwound.

America's Industrial Growth Largely Result of Organized Industry

By ANDREW W. MELLON, Secretary of the Treasury.

ORGANIZED industry is the secret of America's prosperity, the key to future growth and the justification of big business. We can no longer count solely on our boundless resources, but must depend on the increasing efficiency of our industrial system.

Because business is big it is not necessarily a menace. The justification for big business is that it serves the public more efficiently than many small businesses could do in that particular line. Otherwise in a world of inexorable economic laws it would not long exist.

Higher wages and reduced costs of products result from increased organization of industry, and in the end we find that it pays to manufacture in quantity and to make a larger volume of small profits.

This is the secret of our success in America; it is also the reason why much of the distrust which formerly existed because of the size and supposed power of corporate organizations is wearing away as men understand better what these organizations are and how greatly they contribute to our prosperity and our high standard of living. Corporations are no longer owned by a small number of individuals.

Business Instruction in American Universities Worth While

By DEAN RALPH E. HEILMAN, Northwestern University.

Merely training young men to increase their earning capacity does not constitute adequate justification for the inclusion of business instruction in university curricula. The justification for the expenditure of large sums by state and endowed institutions for instruction in business subjects must rest on a much broader basis than this.

Schools of commerce cannot do certain things. They cannot eliminate the necessity for starting at the bottom. They cannot guarantee that every graduate will prove a business success.

But there are many important things which such schools can do. They can familiarize the young man with the operation of the basic law, principles and tendencies which underlie our economic system.

If our schools of commerce during the next generation actually accomplish such results, and there is every indication that they will, they will make a significant and notable contribution to social progress and human welfare.

Changing Conditions Inevitably Will Alter Present Position of Parents

By DR. ETHEL PUFFER HOWES, Smith College Institute.

The family shortcomings are held responsible for the mooted nervous symptoms and the delinquencies of the young people today.

The truth is, as sociologists and educators have asserted, that the position of both parents in the family and of the family within the social pattern, is changing.

The family of the future, as pictured by these authorities in their published symposium, "Concerning Parents," will give the mother full scope for her powers as an individual; will give the father the chance to study child training and take more active part in his child's upbringing, and will transfer from both parents to the community some of the more irksome tasks of the home.

Extension of Public Library Service Demands Attention of Thoughtful

By JULIA WRIGHT MERRILL, American Library Association.

Forty-five per cent of the total population of the United States and Canada is without access to public libraries.

The problem of public library service for 50,000,000 people now without it, is big enough to challenge the best thought and effort of the library profession, to engage the active interest of organizations concerned with education and wholesome living and to demand plans and program on a large scale. It is a nation-wide problem, though largely a rural and village concern requiring special study and treatment as such.

The use made by rural people of the library facilities they have, the growing interest in books and library service on the part of rural leaders and rural organizations show that the time is ripe for rural library extension. There is also urgent need for extension of separate library facilities for negroes.

No Stability in Marriage Without Love as Foundation

By REV. IRA C. DAWES, Detroit Clergyman.

Without love, marriages are an insult to the principals and to the community. A young man marrying today should choose a girl who will enter intelligently and sympathetically into his life's work. A young man should see that she is a home maker, too.

They should have a common ground of agreement and temperament and be relatively equal in culture and religiousness. The primary and only motive for their marriage should be love. It will conquer everything upsetting to a marriage if it is strong and loyal. On the other hand, a young couple can follow all the rules for success in the world and make a failure of their marriage if they haven't love.

Don't marry a girl you have to apologize for.

Don't marry a girl simply because she is pretty, wealthy or popular.

Higher Ideals of Brotherhood Great Need of the World Today

By DR. S. PARKES CADMAN, President Federal Council of Churches.

Casting aside tyrannies and hatreds and cultivating brotherhood and mutual regard are more important to the peace of the world than the building of navies and the training of armies. We welcome world goodwill Sunday. At this season in the schoolrooms of many nations children and young people are thinking of international friendship. The church joins hands with the school in promoting world friendship.

We realize that peace will never be achieved until the minds of men and of nations have been changed. Selfish nationalism, prejudice and suspicion breed the bitterness and dissension that often lead to war. We must cure these frightful diseases of the mind and foster the spirit of justice, fair dealing and co-operation, on which foundation alone can the universal palace of peace stand secure.

JUDGES ARE CHOSEN FOR ESSAY CONTEST

Two men and a woman of national prominence have agreed to judge the American Legion national essay contest for American school children for the year 1926. It was announced recently by Frank C. Cross, national director of the Americanism commission of the Legion.

The judges, announced by Mr. Cross, are Col. Theodore Roosevelt of Oyster Bay, N. Y., former assistant secretary of the navy; Bruce Barton of New York city, noted editor and author, and Miss Mary McSkimon of Brookline, Mass., president of the National Education association.

The subject of the contest this year is "The Patriot's Flag Creed." That subject was chosen by the Legion's commission in the hope that a flag creed suitable for adoption by the nation would be written by some young American boy or girl.

The Legion is endeavoring to secure a patriot's flag creed which will foster greater respect for the flag by setting forth the ideals and ideas for which the flag stands, and the sacrifices and glorious achievements that it represents.

"A perusal of a few hundred of these essays picked at random from the thousands sent in from every state in the Union will dispel all fear that patriotism no longer burns in the hearts of the 'flaming youth' of today," Mr. Cross declared.

Valuable prizes will be awarded the winners of the contest. The first prize winner in the nation will receive a \$750 scholarship in a college or university of his own choice. The second and third prize winners in the nation will receive \$500 and \$250 scholarships, respectively. Winners of state prizes were awarded a silver medal for first prize, a bronze medal for second prize, and a certificate of merit for third prize.

Department of Kansas

Has Research Program

Ancient Indian battle grounds, historic spots and unrecorded trails of early Spanish explorers who preceded the Lewis and Clarke expedition in the Pacific Northwest are expected to be brought to light by investigation and research by the department of Kansas of the American Legion during the spring and summer.

Announcement of the investigations planned was made by Thomas Flinn, a member of the department executive committee, who took the matter up recently with the state historical society.

The knowledge that a Spanish expedition out of Santa Fe, N. M., in the spring of 1630, passed near Kansas City, fought Indians near Quindaro and eventually was slaughtered in a battle at the junction of the Loup with the Platte river in Nebraska, came from an unusual but authentic source, historians believe.

From a manuscript written in St. Louis, Mo., by a priest, the only man to escape from the Quindaro massacre, comes the story of these early expeditions. The manuscript was recently found in the archives of a Paris library. E. E. Blackman, Legionnaire, formerly of Kansas City and now curator of the State Historical society of Nebraska, uncovered the enlightening old manuscript.

Much information is expected to be gained on the early history of the arrival in Kansas of the Wyandotte Indians, a remnant of the Iroquois tribes of New York, it is said.

Bureau Settles Long

Claim for Insurance

The longest claim for insurance of a deceased World war veteran and probably the longest in the history of insurance has just been adjudicated by the United States Veterans' bureau, according to information received by the national rehabilitation committee of the American Legion at Washington, D. C.

Eighty-four relatives were in the permitted class of beneficiaries under the law. Their names, ages and addresses made a list five feet long, the longest ever filed with the bureau.

Included on the list were nine brothers, six sisters, six uncles, six aunts, six brothers-in-law, eight sisters-in-law, twenty-three nephews, nineteen nieces and a stepmother. Thirty-eight bear the name of Taylor. Names of the others include Berch, Bornes, Broadwater, Campbell, Davis, Goss, Lemon, Manning, Ponder and Thornton.

Under the settlement, the stepmother and the fifteen brothers and sisters will each get \$1.92 a month for twenty years.

Sierra Unit Chartered

The first all-Spanish unit of the American Legion auxiliary in the nation was chartered at Costello, N. M., recently, and will be known as Sierra Unit "in token of its high and lofty aims." The first all-Indian unit of the auxiliary was chartered at Bullhead, S. D., not long ago, and is known as West Wind Unit.

ATTRACTIVE WOMEN

If You Would Be Attractive You Must Be Healthy

A beautiful woman is always admired. There are many types of beauty. But no woman can be truly beautiful unless she is healthy. Radiant vitality is always attractive however plain a woman's features may be.

Many a woman has found her health improved thru the use of Lydia E. Pinkham's Vegetable Compound.

Weakness, loss of weight, and a pale complexion were a few of the things of which Mrs. J. C. Taylor of Box 211, Tallahassee, Florida, complained before she started taking Lydia E. Pinkham's Vegetable Compound. "I could not even sit down and talk to a friend for any length of time," she states, "I would forget what I was talking about and felt so blue." Mrs. Taylor is so pleased with the work of the Vegetable Compound that she keeps a bottle of it in the house at all times—and when it is empty, her husband makes sure that she has a new bottle. "I have regained my strength," Mrs. Taylor writes. "I can do all my housework now and I feel just fine."

Lydia E. Pinkham's Vegetable Compound is made from roots and herbs and has been growing in popularity among women for over fifty years.

ETIQUETTE CODE FOR CAR DRIVER

Many Forget Golden Rule While Operating Auto Along Highways.

Good manners in motoring should be given consideration by thousands of drivers who pride themselves on their etiquette at home, in offices and while visiting but who forget the Golden Rule while operating a motor vehicle, suggests David Van Schaack, president of the National Safety Council, who advises:

Motorists should make allowances for both other drivers and pedestrians. The driver who splashes water mud on other people has a peculiar sense of humor. Automobilists should give proper warning, not only to other motorists and pedestrians but even to animals, which are valued by their owners.

Use Horn for Safety.

The horn shouldn't be used for anything save safety purposes. Don't signal thusly to attract the attention of people inside houses. Remember, some folks sleep at all hours of the day, some are sick or nervous and your honking may annoy them.

Your headlights should receive the proper attention so they won't cause inconvenience and danger to other people.

Brakes that squeak annoy people driving along the streets through which you are driving. Have your brakes oiled and adjusted regularly.

Trying to steal a few feet of space, instead of remaining in the proper position, not only annoys and inconveniences other folks, but is dangerous.

Don't try to hog the road. Other motorists have just as much right to the streets and highways as you.

Concentrate on your driving. Look where you are going. Stay in line.

Eschew One-Arm Driving.

It is poor etiquette and reckless driving to be a "one-arm motorist." Give your demonstrations of affection or a more appropriate time and place.

It is bad taste to try to flirt while motoring. Don't think that because you are in an automobile you are privileged to attempt to vamp every prettiest girl who passes your machine.

Retain your poise even if you get into an accident. Of course, the other fellow always is to blame. Swearing at the other party is not only decidedly poor etiquette but bad judgment. Nothing of you may get hurt or land up a police cell.

Being a bluffer in a poker game may sometimes win the pot, but trying to bluff the other driver into thinking you have the right-of-way and are going to beat him across the street, may result in an accident. He, too, may be a bluffer.

When riding in somebody else's car, don't be a back-seat driver. Give him a chance to drive.

In the old days children were seen to cross the street or they may be either seen or heard.

It is not good taste to engage in a sputter with a driver of a commercial vehicle. His vocabulary of cuss words often used while out driving and in extreme cases his strong-arm methods may result in convincing you that it is best to always be a gentleman.

Proper Way to Keep Gas Tank Cap When Filling

There appears to be no good reason why a motorist should stop for gasoline at a filling station, then drive away leaving the fuel tank cap to topple off the running board, trunk rack or wherever he happens to have laid it.

The first thing the average capver does when he removes the cap to put it where he is likely to forget it. Sometimes he leaves this for an attendant to do.

Why not make a habit of putting a cap in a coat pocket?

If mislaid happens to be driving, it has no pocket, why not lay it on the floor of the car?

It is excusable to forget to put the cap back on the tank, but not to set it.

Carburetor Easily Hurt by Using Cotton Waste

In cleaning your engine, it is a wise policy not to use waste. Very often the lint of cotton waste sticks to the various engine parts and when the engine hood is put down is sucked into the carburetor. When this occurs, the flow of fuel is made irregular and sometimes stopped altogether. On many occasions the cause is not readily found and much time is wasted in blowing out the fuel line only to find the trouble in the needle valve of the carburetor.

Instead of waste, it is much better to use some clean piece of old cloth which has a soft finish and does not give off the lint that is so objectionable in the case of waste.

What holds true in the case of waste lint is also true with road dust and dirt. Under ordinary conditions the engine hood and the engine underpan serve to keep a great majority of the dust and dirt out of the air intake to the carburetor. Sometimes drivers are prone to raise their engine hoods in hot weather because of the belief that permitting a free exit of air through the sides of the hood will prevent the engine from overheating.

Easy to Pull Out of Mudhole

Two blocks of wood, some short pieces of chain, and a few eyebolts will supply you with material to build yourself a sure cure for getting stuck in mudholes. As shown in Fig. 1, the wood blocks are cut as large as possible and yet clear the mud guards.

Attaching Wooden Blocks to Rear Wheels to Aid in Getting Out of a Mudhole.

and then the eyebolts are fitted at each corner. The chains can be fitted at one end with snap hooks. At each revolution of the rear wheels, the back of the car is raised up about eight inches and moved along about two feet, finally getting the car clear of the mud.—Popular Science Monthly.

More Attention Should Be Paid to the Magneto

Do not think because the magneto gives you such faithful service that it never has troubles of its own. You probably give it a drop of oil in each oil lead once a week. But the distributor should be cleaned occasionally, using a brush or a piece of cloth dipped in gasoline. The dust which accumulates on it will soon short-circuit it, causing the engine to miss explosions. Dust sometimes accumulates inside the distributor, which must be removed for cleaning. Another trouble is pitting the platinum points of the circuit breaker. When this occurs no current can run at all. If this trouble is suspected run a strip of fine (not coarse) emery cloth between the points a few times. Do not attempt to file them. If circuit-breaker gap is out of adjustment, do not attempt to remedy it yourself.

Height of Chassis Over Road Is Very Important

Hanging a chassis at a height to give an all-over road clearance of ten inches is most satisfactory on the greatest possible variety of road conditions, engineers declare as a result of prolonged tests. The roadability of any car depends to a great extent of the distance of the weight center from the road surface. If the car is set too high, this elevation of the body weight makes it top-heavy and taking sharp turns is hazardous while handling the car is harder. If the car is too low to the ground axles and other projecting points strike the higher road elevations and are handicapped in deep snow or ruts.

ED GROUND

Answering an inquiry propounded by S. M. Chaney, superintendent of Glenn county schools, through H. W. McGowan, district attorney, word was received in Willows, a short time ago from Attorney General U. S. Webb to the effect that the office of rural supervisor of schools is mandatory. This settles a question which arose in Willows when the Glenn county unit, Federation of American Farmers circulated a petition requesting the county supervisors not only to withdraw financial support from the agricultural extension service but also to take steps toward the abolition of the office of rural supervisor. The petition was presented, and although the extension service abolition proposal was placed on the ballot, no action was taken at the last meeting of the board on the matter of rural supervisor. Any action by the board on this office is now believed barred by Webb's latest ruling.

Indicative of the ridiculousness of the claims of the Pacific Air Transport company, Seattle-Los Angeles air mail contractors that Sacramento should not be included in the schedule because of the prevalence of fog is the report of a board of three army officers made on fog conditions in Sacramento. The report was made shortly prior to the establishment of Mathew Field and N. R. Taylor, meteorologist in charge of the Sacramento weather bureau, co-operated with the army men in gathering data. The report, according to Taylor, showed that the fog situation in Sacramento was the most favorable of any metropolitan location on the Pacific Coast and that there were a greater number of flying days here than at almost any point in the country.

When 1,500 Orientals were left homeless by the burning of the little California town of Isleton on Memorial day, the first aid to reach them came from the Japanese branch of the Salvation Army in San Francisco. Staff-Captain M. Kobayashi immediately dispatched a truck load of food and three tents to shelter the women and children. The Japanese Salvation Army officer who was sent with the supplies has since distributed additional supplies and more than 2,000 articles of clothing. This help was given to Japanese, Chinese and stranded Americans alike.

Within the next two months an oil-electric locomotive—the most recent development in the field of railroad motive power—will make its initial appearance anywhere in the world in the lumbering industry in Lassen county. Announcement is made by the manufacturers that an oil electric locomotive of the 100-ton type has been ordered by a lumber company for use in its timbering operations at Westwood, Lassen county. This locomotive will be the first oil-electric to be placed in service at any point west of the Mississippi river.

Angle worms that escape in the night are causing anxiety to George H. Forbes, San Jose. In a letter to Director of Agriculture, G. H. Hecke, Forbes relates he has been trying to breed angleworms in his back yard with a view to supplying the demand among fish for bait from contented worms. His worms refuse to be contented, however, and regularly escape during the night. He ventures to hope the department of agriculture will tell him why the worms leave home and what he must do to keep them well nourished and happy.

An ancient stage coach in service in Round valley, Mendocino county, for more than sixty years has been sent to Universal City. George Fitzgerald, field buyer for the Universal pictures, was in charge of the transportation of the historic old vehicle which he purchased for \$150. It originally cost \$1,800. The movies, according to Fitzgerald, find it cheaper to buy the old vehicles for destruction in their western films, than to build and destroy new ones.

What is said to be one of the most remarkable examples of tree surgery, and one which is probably a record in the amount of cement used to restore decayed parts of a tree, was recently performed near Cloverdale by A. G. Haskell of St. Helena. The tree was a giant pepperwood "Laurel" on the ranch of Mrs. M. F. Slink. This tree is eleven and one-half feet in diameter at the base and in filling the decayed cavity 20 tons and 250 pounds of cement was used.

That the proposed highway connecting the Kern river canyon, Kernville and Brush creek roads with the Mount Whitney plateau is entirely feasible, was the opinion expressed by Supervisor Ira Williams, who was a member of a party which has just completed a tour of the district, traveling for nine days by pack train. The trip was in the nature of a reconnaissance expedition over the proposed route to the highest mountain in the United States.

About fifty boys and girls of Tulare county attended the summer camp for agricultural club members which opened for a three-day session on June 12 at Camp Nelson. This is the first camp held for junior agricultural club members of Tulare county, but it is expected to become a permanent institution.

A resolution opposing "the teaching of Darwin's theory of evolution in the public schools or elsewhere" was announced in Roseville at the conclusion of the four-day session of the Eastern Baptist Association of California and Oregon.

Daddy's Evening

The Spartana Club has awarded a contract to build a \$15,000 clubhouse on its lot in Petaluma.

A Tokyo carnival, a picturesque fall festival on an elaborate scale, will be given at Lodi by the Woman's club of Lodi in September.

Hundreds of delegates from every section of California attended the fourth annual session of the Grand Parlor of the Native Daughters of the Golden West at Sacramento, recently.

Victory Bridge, connecting Antioch and Sherman Island across the Sacramento river, last link in California of the Victory Highway, across the continent, was dedicated and opened recently.

A further extension of time, until June 16, 1927, has been granted by the railroad commission to the California Highway commission in which to construct certain highway crossings in the county of Placer.

Organization to "promote the welfare of the deaf and hard of hearing" the Los Angeles League for the Hard of Hearing filed articles of incorporation at the secretary of state's office in Sacramento recently.

President Coolidge pressed a gold telegraph key in the White House at 11 a. m. June 23, and started the wheels of the huge Exchequer power house revolving. The plant belongs to the Merced irrigation district.

Grasshoppers in unusual numbers are doing serious injuries to the trees and other foliage in the neighborhood of Red Bluff and Probert. Even the shade trees planted along the county highway are being stripped of their leaves.

Announcement was made in San Francisco peninsula circles that the federal government would appropriate sufficient funds for the dredging of the bay out from the San Mateo county shore near Redwood City giving a deep water channel.

A community fair, to be held three nights, September 9, 10, and 11 and the first fair to be staged in the Del Rey community, Fresno county, is planned by the Del Rey post of the American Legion, assisted by the chamber of commerce.

Foot and mouth disease appears to be spreading in the republic of Mexico according to G. H. Hecke, director of the California state department of agriculture. The latest information is to the effect that the disease has recently appeared in the state of Yucatan in addition to Tabasco.

Apricots as large as peaches are the latest physical proof of the kind of produce Tulare is capable of growing. The fact was made known when a Tulare plant enthusiast, brought the fruit to the Tulare chamber of commerce office. They were selected at random from some half dozen trees.

The Northern California Development company filed an application with the Contra Costa county board of Supervisors for a franchise to build a suspension bridge across the Carquinez Straits at Eckley. The proposed bridge will cost approximately \$3,000,000. It will be built at Eckley, narrowest point in the straits.

Announcement is made in Sacramento that the famous Turner apple and pear orchard near Sebastopol, Sonoma county, has been traded at a sum of \$156,000. The Turner ranch comprises 156 acres planted to Gravensteins, Newtown pippins, Bartlett pears and cherries and the products have won many prizes at shows and fairs.

Stories of the asparagus industry of Sacramento county and of the recent festival at Isleton have been printed in all parts of the world. The Sacramento chamber of commerce learned this through Harry H. Dunn, an author, who wrote the chamber that he has sold photographs and information to several foreign news agencies.

Marysville, Yuba county, has devised a new way to protect highway direction signs and markers from thoughtless hunters who insist on practice shooting along the state roads. Unable to curb the marksmen, W. G. Allen, Marysville rancher, has decided to accommodate them. Just above each highway sign he has erected a small white rifle target.

A meeting was held at the Bowman Farm Center near Anderson, Shasta county, to discuss the proposition of annexing four elementary school districts to the Anderson Union high school district. Four districts in that section, namely Barry, Bowman, Evergreen and Fargurrah, have heretofore not been a part of any high school district and the residents there are desirous of joining with Anderson, the nearest available high school.

Forty men, upon whom will fall the responsibility of fire fighting in the mountains during the summer, are now holding a conference at Mineral. Tehama county, considering plans and best methods of attack when fires occur. Inspectors from the head office of the forest service at San Francisco are giving these men intensive instructions in the science of detection of fires, how fires start and methods of suppression.

Edward Steiger, 91, Sonoma valley's oldest resident, who has been driving an automobile almost since they first came into use, worked eight hours a day at plowing and other work at his farm, was rather disappointed when he had his first auto crash. At Maxwell crossing near Sonoma the nonagenarian's car was in collision with the rear coach of a passing train. The auto was wrecked but the pioneer escaped without injury and while waiting for his car to be repaired, borrowed another car and drove about the valley as if nothing had happened.

THE WORLD'S Cry for GREAT EVENTS

ALBERT PAYSON TERHUNE
(© by Dodd, Mead & Company.)

Marathon

A FEW years ago a young Canadian achieved fame by running from Marathon to Athens, and winning the classic "Marathon Race." But no one knows why that race classic and how and when it was first run.

One September morning, in 490 B. C., 11,000 heavily armed men lined the crescent-shaped foothills of Mount Pentelicon, overlooking the sea. Between hills and sea lay the plain of Marathon, six miles long and two in width. This plain, to seaward, was alive with a carnival of barbaric color. One hundred and ten thousand Persians were encamped there, while the six miles of beach and harbor were choked with their warships. They were invading Greece, and the only obstacle to their triumphant progress was that handful of Athenians on the hills, just one-tenth the size of the Persian force.

Greece, in those days, was made up of a number of small states, more or less independent of each other. Athens was not only a city, but a state, and represented the highest form of democracy the world had then known. It was divided into ten communities or districts, each ruled by the people and each furnishing a general for the army. Each of these generals was full command for only one day at time.

Persia was then the strongest potent power on earth. Vast in wealth and resources, it was ruled by an emperor, Darius I, who reigned with absolute sway. Athens, Sparta and one or two other Greek states alone refused him submission. Hence, according to the imperial will, Athens and the other rebels must be crushed. A fleet of 1,200 ships, bearing 11,000 Persian fighting men had landed at Marathon, less than thirty miles to the northeast of the Athenian capital. Thither, to oppose the invasion, the ten Athenian generals hurried all the men that could be mustered at such short order. Multitudes were Greece's greatest soldier, and the other generals wisely surrendered their "day of command" to him.

The fate of the world hung in the balance. Greece represented all that was highest in art, culture, government and civilization; Persia, all that was barbaric, despotic, non-progressive. A Persian victory must mean setback of centuries in progress.

While the Persians waited, lazily, considering the easiest means to attack their puny foe, they were dumbfounded to see the 11,000 Greeks rush at full speed down the slopes and into the plain. Spread out in a thin line so that they could not be outflanked and shouting their wild battle hymn the heavily armed Greeks—athletes—all—ran furiously across the mile or level ground at the base of the mountain and hurled themselves on the unprepared enemies. Through the looser, more lightly equipped Persians lines the two Athenian wings bore away their way. The Greek center alone gave back before superior numbers. The wings then whirled and, reinforcing the center, again tore through the Persian ranks. The invaders, panic-stricken, fled to their ships. And there, in the confusion of embarking, a second and fiercer fight waged. The Persians got to sea at last, leaving more than 6,000 dead and seven captured galleys in the victors' hands. The Greek loss was but 192.

Fearing lest the baffled foe might sail to the harbor of Athens and take the city unawares, Miltiades sent a swift runner to bear a warning and the news of the victory. Thus was the first "Marathon" race run. Thus too—against odds of ten to one—was civilization saved.

Ten years later Xerxes, son of Darius, sought to wipe out his father's disgrace by invading Greece with an army of more than a million men. A mighty host lay encamped before him the Persian monarch wept aloud at the thought that within a century the entire million or more would be dead. Eight hundred Persian warships entered the Gulf of Salamis. There they were attacked and routed by a far smaller Greek squadron.

A mighty land force of Persians, meantime, had invaded Greece, conquering, burning and slaying as they advanced. The only road from southern to northern Greece lay through a narrow pass, Thermopylae by name, between a steep mountain and a marsh. Here the Spartan king, Leonidas, gathered about 5,000 men from Sparta and other Greek states to block the invaders' way. For two long days the Persians hurled their vast legions against the dauntless 5,000. On the third day, through a traitor, a secret road over the mountain was revealed to them and over this they marched an army to hem in the Greeks on both sides. The defenders, hearing of the approach of this flanking party, for the most part fled. But Leonidas, with 700 Spartans, stood his ground. Though they could no longer check the invasion, they could and did oppose it till all save one or two lay dead. It was one of the most heroic defenses in history, and the names of the men who thus died were immortalized throughout all Greece, while the survivors were treated with contempt and their relatives went into mourning for their shame.

In this way, more than 2,000 years ago, Democracy defied Despotism.

SECRETARY INSPECTS CROSS COUNTRY CAR

The Ordnance department, in conjunction with the equipment boards of Infantry, field artillery, cavalry and corps of engineers, have erected its type of cross-country car, to provide light vehicles with a high degree of mobility. The service test of this type of car is sufficiently advanced to permit its standardization by the War department for issue to organizations heretofore equipped with motor cycles and light trucks. In the front seat can be seen Secretary of War Dwight F. Davis, and in the rear Maj. Gen. John L. Hines, chief of staff, and Maj. Gen. Fox Connor, deputy chief of staff. The demonstration was made in Potomac park over very rough ground

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Evelyn Smith is now spending her vacation at St. Helena.

Mr. and Mrs. H. Lorenz and family will spend the holidays at Big Basin.

L. Lombard returned last Saturday from his two weeks' vacation spent at Willow.

Miss Katherine McKeown, assistant librarian, is spending her vacation at Boyes Springs.

Mrs. Louise Kuebler, of Rutherford, is visiting with her brother, Bill Hopmann, for a few days.

Mrs. E. Olliotti, of 1134 Hanover street, has moved into E. Cuneo's new house on Brunswick, which has just been completed.

Esther Ross is spending her vacation on her aunt's ranch at Galt.

William Lewis, of 6818 Mission street, is visiting his aunt at Rodeo.

Henry Schlobahn, of Berkeley, visited his niece, Mrs. H. H. Smith, last Sunday.

Miss Dahlia Hopmann, of St. Helena is spending the week with her sister, Mrs. H. H. Smith.

Mr. Bostock and family, of 134 Santa Barbara avenue, moved to 68 Vendome avenue last week.

Mrs. L. Ross has returned from her vacation at Galt, where she has been visiting her sister-in-law.

Mayor H. H. Smith is back in town again, and plans to be with us at least a month before returning to Walter's Springs.

Walter Murphy, Mrs. M. Murphy, Mrs. A. Cochrane and Patricia Cochrane motored to San Jose on Monday to visit friends.

Wednesday evening the members of the La Fiesta Club went swimming at Suto Baths, where they report having had a wonderful time.

P. Ross has purchased a new home in the Robson Tract, at the foot of Evergreen avenue. It is a new and up-to-date home. They plan to move some time around July 15.

Alice Elmers will spend the Fourth at Guerneville.

Mr. and Mrs. A. Selmi and family motored to Napa Soda Springs last Sunday.

Harold Ross has returned from Vallejo, where he enjoyed a pleasant vacation.

Mrs. Roth and sons Benny and Leon left Sunday for a vacation in Big Basin.

Mrs. H. Faulkner, of 237 Crocker avenue, is spending her vacation at Guerneville.

Mr. and Mrs. L. Stark and daughter Francis spent Thursday at Belmont, visiting friends.

Daniel McSweeney was in Daly City last Monday, meeting many of his old time friends.

Mr. and Mrs. C. McKee, of Irvington street, spent a few days in Pasadena last week, visiting friends.

Mr. and Mrs. S. Plansky will celebrate the twentieth anniversary of their wedding on Sunday, July 4.

Mrs. C. S. Closky, of Irvington street, is at St. Luke's hospital suffering from a nervous breakdown.

A baby boy was born to Mrs. Arata, of Peoria street, last week. Both mother and baby are doing well.

Miss Mary Brennan and Miss Gertrude Murphy, of Daly City, attended a party at Burlingame last Saturday evening.

Rose Eisenberg, of 145 Miriam street, and her chum, Betty Sime, of San Francisco, are enjoying a vacation at Rio Nido.

Mrs. White and Mrs. Scott, of Daly City, spent Sunday in visiting Mr. and Mrs. Parker, of Santa Rosa, who formerly resided in Daly City.

Miss Marie Grandale, of Oregon, niece of Mrs. Templin, of Peoria street, is to arrive in San Francisco next week to spend a two weeks' vacation.

Daly city has been re-routed within the last month and now the water office reports that all the books have been revised. This efficiency is much to be commended.

Tony Modica is spending a short vacation with his father. He has made his home in Daly City for the past year and will probably attend the Jefferson high later on.

The next regular meeting of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will take place in Masonic Hall, Daly City, on Wednesday evening, July 7.

Mr. and Mrs. G. Carle left Monday on their honeymoon in the Canadian Rockies.

Mrs. J. W. Brown and daughter, Mrs. Hahn, left for Santa Rosa last Wednesday.

Mrs. Dave Campbell's parents, Mr. and Mrs. Heywood, left Wednesday for Healdsburg.

Mr. and Mrs. William Sherwood, of 231 Los Olivos avenue, will spend the Fourth in Fairfax.

L. Ross attended the meeting of the Santa Clara Retail Merchants' Association held at Palo Alto July 1.

Mr. and Mrs. J. Kennedy and family, of 6893 Mission street, left Saturday for Big Basin. They plan to stay for about five weeks.

At the wedding of Miss E. Brown and Mr. George Carle, the Rev. Ord Congdon, former minister of the Daly City M. E. church, officiated.

There was some lively bidding in the tax collector's office in Redwood City last Thursday when the delinquent tax properties sold by the state were sold at auction.

Trustee A. J. Bodien and family will leave next Sunday on a motor trip to Reno, and plan to return by way of Lake Tahoe, where it is expected they will do some fishing.

Mrs. H. Fellows, Mrs. MacDonald and Mrs. Mathias went to Palo Alto last Saturday. The purpose of the trip was to take cigarettes and sweets to the boys at the Palo Alto base hospital.

Members of Woodrow Wilson-Vista Grande P. T. A. are requested to attend a special called meeting at the home of Mrs. F. Junker, 149 Miriam street, Tuesday afternoon, July 6, at 2 o'clock.

The new filing desk in the Daly City library is a decided improvement. It was made under the supervision of our librarian, Mrs. O'Rourke, and will make the filing much more efficient.

Alice Parker, of Santa Rosa, a former resident of Daly City, who has been in town recently, is now visiting Mr. and Mrs. Ed Flood, of San Francisco. The Floods are also old residents of Daly City.

Building permits have been issued to Horace Fellows, 64 Vista Grande avenue, for the erection of a four-room house and garage, and to the Reliance Jobbing and Repair Co., 320 Woodrow street, for alterations.

A birthday surprise party was given for Mrs. A. Romer on June 30, at her home, 289 Brunswick street. Those present were Mesdames J. Campbell, D. Campbell, S. A. Landini, M. A. Freeman, Hoffman, Hodeck, F. Sampson, Burgess.

On Wednesday evening Mr. and Mrs. H. Warshawski entertained Mrs. M. Jacoby and daughter Lorraine, of Portland, Oregon. Dr. and Mrs. Solomon accompanied them to the Columbia Theatre after a pleasant dinner at the Warshawski home.

Another of those enjoyable beach dinners was held at Fleishacker playgrounds and vicinity by the Woodrow Wilson-Vista Grande P. T. A. last Monday. About twenty ladies and a large group of children enjoyed the affair.

Two of the new homes built by W. Raffetto have been sold. J. F. Furlong has purchased the one at 71 Acton street, while Mrs. E. Burns has bought the one at 77 Acton street. Both plan to bring their families to Daly City and settle here permanently.

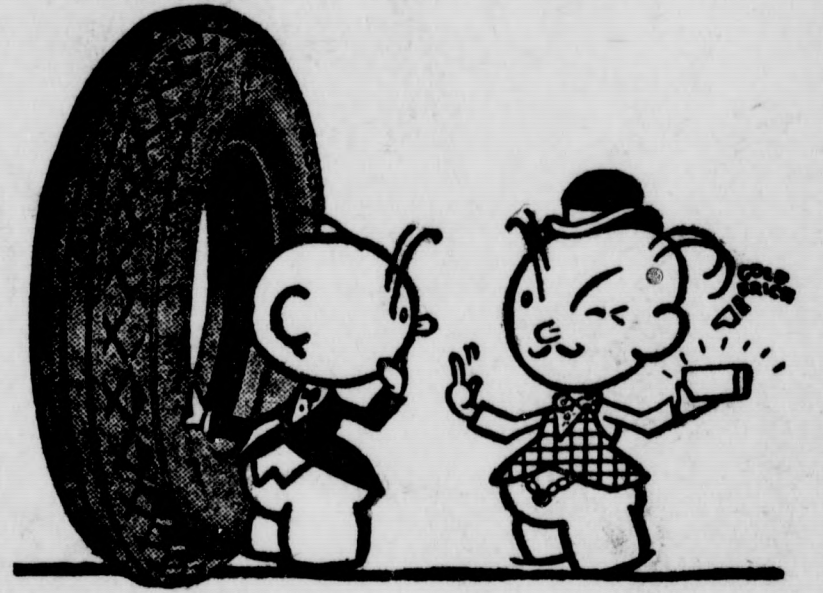

On Tuesday evening, July 6, a huge whist party will be held in the Daly City Auditorium. It is for the benefit of the St. Maximus church and under the supervision of Mrs. M. Murphy. A very pleasant evening is promised to all who attend. Play starts at 8:30. Score cards 25 cents.

A room in Ryan's Hall has been rented and is being fitted up to house the activities of a Philanthropy Center under the auspices of P. T. A. workers. The next whist party of Woodrow Wilson-Vista Grande P. T. A. will be held in this room, Tuesday afternoon, July 13. Do not forget the date.

The many Daly City friends of Mr. and Mrs. Raymond Dhuyvetter extend their sympathy at the death of their beloved son, Charles, who fell and broke his neck while at work last Monday, his death occurring a few hours later at the Emergency hospital. He was buried from the W. C. Lasswell & Co. undertaking parlors Thursday morning.

They'll Dishrag You Every Time

Trying to buy a tire for less than it's worth is just one example of the triumph of hope over experience. Sure, some tire dealers will dicker with you—give you all sorts of trick discounts and long trades. Why not? It's a cinch to pad up the old price list to allow just such deals.

But don't forget you're playing the other fellow's game and the odds are nine to one that he'll dishrag you every time.

My customers buy Goodyear Tires because they have learned that Goodyear gives them the least trouble and the lowest cost per mile. These—after all—said and done—are the things to look for in any tire. Let me show you a Goodyear next time.

COUNTY LINE SERVICE STATION

GEORGE E. ARCHER, Proprietor

5900-60 Mission Street

Rev. Ord Congdon, former pastor of the Daly City Methodist Episcopal church, preached at the services of the Community Center church held in Ryan's Hall. Mr. Stotts and Mrs. D. T. Bentley sang a duet and Mrs. Bentley sang a solo. The services were fairly well attended, and the program was excellent.

The new hardware display at Smith's new store is really inspection.
